PROJECTS

Hospital Management System

Developed a comprehensive web application using Django REST Framework and React, featuring user authentication (registration, login, logout) and role-based access control for doctors, nurses, and patients. Managed models for User, Receipt, and Appointment, enabling efficient record-keeping and appointment scheduling

Django-based Movie Review Blog

Developed a dynamic movie review blog using Django, enabling user authentication (registration, login, logout) and profile management. Users can view movies and their reviews, leave comments (only when logged in), and access the latest movie news via a REST API integration. Implemented features like sorting movies by release date
